

Technical Committee 184: Industrial automation systems and integration
Subcommittee 4: Industrial data

TC 184/SC4 N 997

2000-03-13

ISO TC184/SC4
SC4 Resolution
Cancellation of AP 208 & ISO 10303-308
from
WG3 Convener

Introduction: There has been no progress on AP 208 since the Committee Draft ballot, which was registered on 1998-10-30. There is currently no leader nor are resources available to bring AP 208 to International Standard status. The High Level Information Planning Model for Product Life Cycle Support (PLCS) PWI (ISO 10303-PWI 0032) is planning to address most of the scope of AP 208 as part of its NWI proposal. It plans to treat the AP208 CD and its set of comments as one of its inputs. The PLCS project does not wish to reuse the AP208 name and number.

Objective: Cancel AP 208 and its associated Abstract Test Suite

Resolution: SC4 cancels ISO 10303-208 and ISO 10303-308. SC4 directs the High Level Information Planning Model for Product Life Cycle Support PWI to treat the ISO/CD 10303-208:1998 document and its set of comments as input.

Attached documents: None.
